

HEMANTH KUMAR BANDARU

+44 07721377521 — hemanthkumarbandaru23@gmail.com — linkedin.com/in/Hemanth — github.com/Hemanth

Education

2025 - 2027 Msc in Computer Science at **Teesside University, UK**

2020 - 2024 B.TECH in Computer Science at **Vignan Institute of Information Technology** (GPA: 8.3/10.0)

Work Experience

Full Stack Developer

Nov 2023 – feb 2024

Intern, *SlashMark(Remote)*

- Completed assigned tasks in Full Stack Web Development using Flask and MySQL for backend development.
- Designed responsive front-end components with Bootstrap, HTML, and CSS.
- Worked on API integration and learned how APIs facilitate communication between frontend and backend systems.

Web Developer

May 2023 – Jun 2023

Intern, *Octanet(Remote)*

- I successfully contributed to the development of responsive and visually appealing web applications.
- With a solid understanding of front-end development principles, I effectively implemented user interface designs using HTML, CSS and JAVASCRIPT.
- Throughout the internship, I demonstrated a strong ability to work in a team environment, communicate effectively, and meet project deadlines.

Projects

Text Summarization of Online Meetings using NLP

- Engaged in a team of five members to develop and execute a project focused on text summarization of online meetings using Natural Language Processing (NLP) technique.
- objective was to produce comprehensive summaries of online meetings, enabling efficient review and extraction of key insights.

Tech Stack: HTML, CSS, Django, MYSQL, NLP

Lunar Landing using Reinforcement Learning

- Developed an intelligent Lunar Lander agent using Reinforcement Learning, enabling autonomous and safe landing through trial-and-error learning.
- Evaluated model performance through simulations, achieving improved landing accuracy and demonstrating strong understanding of RL concepts, state-action spaces, and reward functions.

Tech Stack: Python, OpenAI Gym, NumPy, TensorFlow/PyTorch, Reinforcement Learning (DQN)

Car Price Prediction

- Collaborated in a team of four to design a Car Price Prediction.
- It aims to predict the price of a car based on various parameters such as brand, model, year of manufacture, mileage, and other features.

Tech Stack: HTML, CSS, Flask, MYSQL, ML

Technical Skills And Interests

Languages: C, C++, Python, MYSQL, HTML, CSS, Javascript

Frameworks: Flask, Django, Bootstrap

Soft Skills: Communication, Problem Solving, Analytical Skills, Organisation

Interests: Travelling, Photography, Content creation, Editing

Tools: VS Code, Git, Github, PowerPoint, Excel

Achievements

Finalists for the prestigious national-level Hackathon held at Rajasthan, India.

2-Star coder in CodeChef, Qualified TCS NQT - IT Exam Twice.

Solved more than 500 problems in all platforms including leetcode, hackerrank, hackerearth, codechef.

Volunteering Experience

Media Cell Team lead in college. Organised events, Hackathons, Food Stalls and workshops in College.

Worked as a Church Tech Lead, overseeing media production including thumbnails, YouTube Shorts, live streaming, and service recordings for three years.
